

hatponboard - Bug #20

Improve HATP plan-request parsing

2014-04-29 16:37 - Raphaël Lallement

Status: New	
Priority: Normal	
Assignee:	
Category:	
Target version:	
Description	
In some cases HATPOnboard crashes after receiving a request.	
For instance if a parameter in the plan request is repeated then it will segfault.	
But repeated parameters should not be forbidden, it can happen that a domain needs a parameter to be repeated.
