

hatponboard-lib - Feature #24

Make it possible to declare enum in HATP domains

2014-04-29 16:44 - Raphaël Lallement

Target version:	
Description	
To propose enum declarations would make it possible to predeclare some value for a field and then make it easier to reason about this value.	
Would prevent the usual Agent.type="ROBOT";	
A small typo and the whole domain would not work with the current method, the enum should fix this.
